FOR IMMEDIATE RELEASE

Non-profit Honors 65 PC-MEP Graduates

San Jose, Calif., (August, 5th, 2004) - 65 minority students in the age group of 10-16 will proudly graduate from Unity Care Group's Pre-College Minority Engineering Program on Friday, Aug. 13, with a better understanding of science and math-based careers. The graduation ceremony will be held in Room 189 of the San José State University Engineering Building from 7 to 9 p.m. Ann Johnson, director of engineering at Silicon Graphics Inc., will be the keynote speaker. SGI, the world's leader in high-performance computing, visualization, and storage, has been a supporter of the engineering program for the past three years.

The Pre-College Minority Engineering Program, or PC-MEP, is an educational program that introduces students to the latest technologies by encouraging them to explore, design and build technology-based projects. It is hosted by the San José State University Engineering Department during the summer months and local middle and high schools during the school year.

This summer students researched and learned about different technologies like semiconductor manufacturing, computer networking, software and digital video production. 27 students participated in the first summer session that lasted from June 21 till July 16 and 39 students attended the second session from July 19 till August 12.

ABOUT UNITY CARE GROUP

Founded in 1992, Unity Care Group, Inc. is a community-based non-profit multi-service youth and family development agency. Founded with the goal of developing educational and social programs to enrich the lives of at-risk youth, our mission is to provide quality youth and family programs for the purpose of creating healthier communities through lifelong partnerships.
